Legal Reform.

In this age of progress and reform, when all things are undergoing severe and careful examination and criticism, preparatory to the application of the all-moving band of improvement, nothing seems more worthy of the attention of all classes than the proposed revolution to be effected in the various branches of the law. All the interests of every member of society-life, liberty, jury, have, we think, an injurious effect, by exproperty, happiness-are subject to the power of the law, and liable to come under its operation. As a legal sage has remarked, none is so exalted as to be above its influence, and none so humble as to be unworthy of its protection. It is, then, the interest of every citizen that the laws shall not only be good in themselves, but properly and justly administered.

Our whole system of law was founded originally upon the old common or unwritten law of England, and though indebted to it for all its greatness and best features, it has, at the same time, inherited from it many cumbersome defects which, in the present age of the world, amid the lights of knowledge and experience we have acquired, contrast most unfavorably with the advances we have made in all other things.

In several States of the Union, especially in New York, legal reform has received much attention, and the people of those States are now enjoying the advantages resulting from clear, concise. and rational systems of jurisprudence. Whether those systems are all that they should be, experience alone can show.

Time and space will not permit a full examination of this subject. We shall merely direct attention to a few of the branches in which reform

Practice and pleading, as they direct the mode of entrance into the great temple of justice, without which nothing can be effected, require most the careful hand of reform. The rules of practice are, we think, more important subjects of study to one desirous of becoming a successful practising lawyer, than the most intricate principles of law; for on them must he, in nine cases out of ten, rest his case, and, if ignorant of them, he must fail, whatever be the merits of the cause. Simplification is here the great desideratum.

It cannot be denied that special pleading is well worthy of our admiration as a complete system of legal logic; but, is the preparation of the circumstances of a case for the application of now wish the principles of law, or for the decision of a jury, so herculean a task as that an abstruse on the great interests of the country. science is necessary to effect it? For the sake of justice it is to be hoped that it is not. By the English system of pleading, adopted in the United States, an issue for trial by the court or jury, as it may happen to be of law or fact, is arrived at by the natural effect of the pleadings themselves. A point is thereby reached where one party alleges and the other denies, a material fact, upon which it is joined and trial had. In almost ing. In this, it is true, we have a great advantage over many others; but let us see whether for insafficiency in the manner of statement, or this is generally decisive of the fate of the cause, the action must be decided upon a point of form, and not upon the merits, which is unjust. For example if the plaintiff in an action for assault and battery, should omit to state in his declaration the time when the aspult was committed, the defendant can demur specially for this omission, and the decision must be in his favorthough the time stated by the plaintiff, if stated at all, need not be proved as laid. This is clearly contrary to all justice. Again, on pleas in abatement, cases have been decided on mere matters ed territory—that to do all this requires adm fendant. It is true, indeed, that of late years amendments of the plendings, in these respects, are very freely allowed; but why should a system prevail which will cause injustice unless evaded by the ministers of the law?

The many inconsistencies of the old system of pleading are so glaring that they should have long since caused its abolition. To give some examples-a defendant may plead, in an action of trespass for assault and battery, two entirely repugnant pleas, viz., not guilty, (that he did not commit the assault,) and that he committed it in self-defence; or, in an action of debt on bond, he can plead that he did not execute the instrument, and also that he executed it under duress of imprisonment! These are truly absurd. Again, the general issue or general denial by the defendant of the allegations made by the plaintiff, gives room for almost any ground of defence to which the defendant, at the trial, may choose to resort; the questions offered by this issue being, in fact, whether the defendant be indebted to the plaintiff, or liable to the plaintiff's demand, as set forth in the declaration. These questions are so very vague and general that they give full liberty to the defendant to work a surprise upon his opponent by making some totally unexpected defence, for which he may be altogether unprepared. A clear and plain statement of what particular fact is denied would remedy all this. The case of each party is so effectually concealed from the other that it is utterly impossible, before coming into court, to know what each is to prove or disprove. Besides these, a few of the and use it; the Loco policy is let it alone and many weighty objections to be made to the sys. many weighty objections to be made to the system, the excessive subtlety and needles precision by which it is characterized—the frequent necessity it brings upon litigants of making costly amendments of proceedings—the frequent total failure of justice upon points of mere form-all tend to produce a feeling of wonder that so cum-

In connexion with pleading, the declarations, pleas, replications, &c., now in use, have long been the glory of Punch, and the laughing-stock of children, though they are still solemn forms in our courts of justice! For example—the declaration in assault and battery alleges that the plaintiff came with swords, stones, sticks, staves, bludgeons, and various other deadly weapons, too numerous to mention; and beat, struck, kicked, and generally and promiscuously operated on the head, neck, face, breast, arms, back, legs, and, indeed, all imaginable portions of the body, of the defendant!

The same needless and ridiculous verbosity runs through all the various forms of conveyance in use. Not to tire the reader, we will give a short extract from a deed of bargain and sale, viz: "De give, grant, bargain, sell, release, convey, and confirm, and, by these presents, have given, granted, bargained, sold, released, conveyed, and confirmed, all my right, title, interest, and estate," &c. Why not write "sell my title," &c.

In the law of evidence, the objections made t the competency of witnesses on account of interest, marriage, and religious belief, instead of admitting their testimony, and leaving the question of their credibility to the decision of the cluding useful testimony.

As for the adjudication of mixed questions of law and fact by juries, and the election of judges by the people-reforms lately introduced-time alone can show their propriety or impropriety. We have great faith, however, in the good sense of our people in all that concerns their interests. They seldom go wrong, and, when guilty of mistakes, speedily discover and correct them.

Mr. Everett appointed Scoretary of State -Letter from Mr. Everett. FUROM THE NATIONAL INTELLIGENCER OF THIS MORNING.

It gives us great pleasure to understand that the President has offered to the Hon. Edward Everett, and that the latter has accepted the vacant post of Secretary of State.

There is a peculiar fitness, we think, in this appointment. Mr. Everett was the attached personal friend of the Statesman whose lamented death caused the vacancy in the Department, as well as an irreparable void amongst the great men of the world. To this recommendation, however, may be added the higher consideration of the eminent qualifications of Mr. Everett for the office. His public services, at home and abroad, uniting experience and a thorough ac-quaintance with our foreign affairs to his fine abilities and regulated temper, render him a worthy successor to the honors and duties of the

After we had penned the above paragraph, we had the pleasure to receive through the Boston papers the subjoined letter from Mr. Everett. Its patriotic spirit, and the high testimony which it bears to the eminent character and merits of General Scott, give to the distinguished writer fresh claims to the public respect:

Boston, October 29, 1852. DEAR SIR: I remain of the opinion, with re spect to the course to be pursued, which was expressed in my letter of the 20th. I have most deeply regretted the existing divisions of opinion. ng as it was possible that any measures could succeed in favor of a nomination of Mr. Webster, I exerted myself to the utmost of my webster, I exerted myself to the utmost of my ability to promote that end. The grave has closed over every possibility of that kind; and I could now wish that in that honored grave might be buried all dissensions among those who think alike, and have been accustomed to not together,

For myself, I shall vote for the regular Whig electoral ticket. I have been acquainted with Gen. Scott for many years, originally as a known political friend of the administration of Mr. Adams, and the warm personal friend of Mr. Clay. As a public man, I have had some official intercourse with him. I have nothing to say of his eminent military talent. But he has been employed on several occasions of great importance and difficulty, not of a warlike character, and always with credit and success. He has every the and of procedure, including our own shown, I think, beyond dispute, that he possesses equally systems, no issue is produced by the plead-great qualifications for civil service. His conluct, at once firm and conciliatory, in 1889. materially contributed to the peaceful adjustment of the difficulty on the Northeastern boundary, there be not defects as well as advantages. By where the danger of a collision was much special pleading, causes are frequently decided greater than was generally known. I well recupon points of mere form. In case of demurrer ollect the relief of mind which I experienced for insufficiency in the manner of statement, or where issue is joined on a plea in abatement, the issue involves a question of form only, and, as this is generally decisive of the fate of the cause, that the people of Massachusetts entertained the highest opinion of his spirit, energy, and discretion. I am not aware that at any time any one dissented from this view of his character. Events which have since occurred have certainly confirmed its justice. Without being any judge of warlik operations, I cannot be mistaken in thinking that to land within the tropics an army consisting principally of soldiers then for the first time in the field, to lead them through a foreign country a thousand miles from home, and besid gaining every battle, to acquire the good-will of the better part of the inhabitants of the conquerof form, such as the Christian name of the de- istrative talent, as much as it does the talent for military command. Indeed, I suppose the actual conflicts of the field of battle, with troops like ours, to be by far the least difficult part of the

undertaking.
I would, as I have intimated, have done any thing in honor to obtain Mr. Webster's nomination; but I have not the least doubt of General Scott's ability to conduct an able, patriotic, and successful administration. Experience has, in my judgment, shown that he possesses qualities and is governed by principles peculiarly called for in the present condition and prospect of af-

In every section of the United States, the most barefaced and malignant frauds are being perpetrated by the Loco party. In Kentucky we are informed by the Cincinnati Gazette, they are circulating a hand-bill, in which the garbled and forged letter that the Locofocos persist in saying Gen. Scott wrote to Reed in 1844, is still further changed. In this infamous hand-bill, Gen. Scott. is made to say : "I am happy to see by the Philadelphia National American, that religion is to be INCLUDED as a party element." In the Cincinnati Euquirer of Tuesday last, this very letter is above paragraph. So that, not content with altering the letter in the first place, they are base enough to alter it still further, but very careful to escape. to keep this version of the letter from the eye of the public. The New License Law.

It may not be generally known that the City Councils recently passed an amendment to the icense law of last year, requiring that taverns shall comply with the regulation heretofore applied only to ordinaries, restaurants &c., viz: that they shall have the signatures of a majority of the resident house-keepers, consenting to the continuance of such tavern, ordinary, restaurant, &c. on the square where they reside. It is believed by the friends of virtue and sobriety that it is only necessary for the people to know their rights, to exclude many of these establishments from our midst. This right is accorded to ladies keeping house as well as gentleman. Let all refuse to sign without fear or favor, and the result will be the GOOD OF ALL.

D'ALLY COMMENTARY: A Practical Exposition of Seing throughout the Year. Being a Companion to Family Worship. By One Hundred and Eighty Clergymen of Scotland. Sto.

"Sectiand ab unds with learned and pious ministersmen of sterling piety and fervent zeal in the cause of Ged. The commentaries which we have read are decid dly practical in their nature, and do not seem to have been written in eight of any party creed or confession of faith. As an sid to family devotion we can safely recommend it, and hope it will be extensively used for this purpose, as it supplies a want which has been long feit in the churches."—Christian Adecents and Journal.
